EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alan Kopecki on December 8, 2005.

In the claims:

Claim 16 (between lines 10 and 11)- insert the following language:

 the supplementary reinforcement comprises at least two groups each formed of at least two strips that extend in the circumferential direction;

Allowable Subject Matter

2. Claims 1-4 and 6-21 (renumbered 1-20) are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Kawamura (US 4,953,605)- as best depicted in Figure 7, Kawamura teaches a pneumatic tire construction having a supplementary reinforcement structure comprising a first and second group, wherein said first group is defined by at least two inside reinforcing layers or strips 7 and second group is defined by at least two outside reinforcing layers or strips 6. It is evident from Figure 7 that (a) strips within each of the above noted groups have a substantial degree of overlap as

Application/Control Number: 10/720,184

Art Unit: 1733

required by the claimed invention and (b) strips have a width that is substantially the same as the width of the group and thus, each strip has a width that satisfies the claimed invention. In this instance, though, the claim requires that the respective strips have an overlap that is at most equal to 40 percent of the width of the strip- as depicted in the figures, the strips of Kawamura have an overlap that is substantially equal to 100 percent of the width of the strip. One of ordinary skill in the art at the time of the invention would not have found it obvious to form a tire having the specific supplemental reinforcing structure of the claimed invention.

Regarding claim 16, the layers or strips of Kawamura are plies as compared to layers formed by winding a reinforcing element or a strip in successive turns. The claimed structure in which successive turns are overlapped is significantly different than the ply structure of Kawamura and one of ordinary skill in the art at the time of the invention would not have found it obvious to form the supplementary reinforcement of Kawamura in accordance to the claimed invention.

With respect to claim 20, the tire of Kawamura does not contain a rubber layer having the claimed modulus between the carcass and the supplementary reinforcement- as depicted in Figure 7, the supplementary reinforcement located on the inside of the carcass is positioned directly adjacent the carcass and one of ordinary skill in the art at the time of the invention would not have found it obvious to include the claimed layer in the claimed location.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Page 4

Application/Control Number: 10/720,184

Art Unit: 1733

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justin R. Fischer whose telephone number is (571)
 272-1215. The examiner can normally be reached on M-F (7:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino can be reached on (571) 272-1226. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
